Screw Specification for VESA Plate Stand or Wall Mount

1. $(B)+5\text{mm} \square \text{Screw Length (A)} \square (B)+6\text{mm}$
2. Mechanical Screw $\Phi 4\text{ mm}$

Caution: Please follow the Screw Specification in diagram while assembling VESA Plate stand or Wall Mount Plate into monitor back cover. Otherwise, it may cause a mechanical damage.

Quick Installation Guide for Touch Panel Driver

The Driver supports a lot of operating systems, i.e. Windows 7, Windows XP, Windows XP Tablet PC Edition, Windows 2000, Windows 98, Windows ME, Windows NT4, Windows CE2.12/3.0/.NET, DOS, iMac, and RedHat / Mandrake Linux.

Follow these steps to install Touch Panel Driver.

1. Put the **Driver** CD to CD-ROM.
2. Change directory depending on your operating system.
3. Double click the **Setup.exe**, then windows starts to run the installation program.
Notice that does not plug the USB controller on the system before the installation has been finished.
4. Just click **[Next >]** button to continue installation.
5. Then check the check box if PS/2 touch controller is to be installed. The default is unchecked. Then Press **[Next >]** to continue installation.
6. Choose the setup type that best suits your needs. There are two accessory utilities for choosing, **Rotation Monitor Utility** and **Shutdown Utility**. Users can install the utility they want by checking the box. Then Press **[Next >]** to continue installation.
7. Select the appropriate folder where set-up files will be installed. Then click on **[Next >]** to continue installation.
8. Then type in the name of program folder for the touch panel driver or click on **[Next >]** to continue. There will be a default name for it.
9. Windows is copying files to disk and the setup is complete. It will request re-boot computer. Press **[Yes >]** to re-boot immediately or **[No >]** to re-boot later. The installation will not be finished until system re-boot.
10. Setup is complete. After the touch panel driver installation, the USB device will be found automatically as soon as it was plugged into the computer. Then users can see the new device on the application program window. And, the program will remove the USB Device automatically as soon as it was unplugged.

Calibration Guide for Touch Panel

4 points calibration

1. It needs calibration before the touchscreen can work accurately. Whenever the user feel the accuracy lost, user can do calibration again to get a more accuracy touch function.
2. Pressing this button, a new window will be popped-up at the location when the touchscreen was mapped to area for this touch system to guide the user do 4 points calibration. Screen displays as follows.
3. User should follows the guide to touch and hold the blinking X symbol in the calibration window until it does not blink to make sure that the utility can gather enough data for computation. In addition, a time line bar is shown in the bottom of the window to indicate time elapsed. If the touchscreen was not touched before the time line bar going to right end, the calibration task will be terminated automatically.

Touch the blinking symbol on panel until beep or stop blinking.

Linearization

1. Linearization (25 or 9 points calibration) function is used to compensate the touchscreen linearity. After linearization completed, the linearity of the touchscreen will be shown in the Linearity curve window.
2. Pressing this button, a new window will be popped-up at the location when the touchscreen was mapped to area for this touch system to guide the user do 25 points calibration. User should follows the guide to touch and hold the blinking X

symbol in the calibration window until it does not blink to make sure that the utility can gather enough data for computation. In addition, a time line bar is shown in the bottom of the window to indicate time elapsed. If the touchscreen was not touched before the time line bar going to right end, the calibration task will be terminated automatically.

Draw Test

This function is used for accuracy and performance check. Press this button and a new pop up window will be popped up in the location where the touchscreen was mapped to the touch system as below,

User can press the Clear button to clear the window. Press Quit button to terminate this draw test. In drawing test window, users can verify the panel linearity, calibration capability, and drawing line quality.

Mouse Emulator

The touch panel driver emulates mouse left and right button function. After installing the touch panel driver, a mouse icon will show in the desktop.

1. Change right / left button by clicking the upper small rectangular box of mouse icon. Blue area expresses what button has been selected.
2. Touch panel driver also provides an option for advanced Mouse Emulation setting. When user enables the "Auto Right Button", it will force driver to report a right click mouse event to OS when users do a continuing touch till time out. It no longer needs to touch the right button in the Touchtray to activate a right click. This feature makes users to do right click more easily with touchscreen.

Troubleshooting

Make sure that your monitor is properly installed if you have encountered any trouble using this product.

There is no picture on the screen.

Check:

Regulation (Certifications)		FCC, CE

Notice:

Product specification is subject to change without notice.

Limited Warranty Policy

All LCD monitors feature a three-year-limited warranty with free change in the first year from the date of purchase. If product is determined to be defective, we will repair or replace the product with refurbished or remanufactured parts or components during the warranty period.

This warranty is valid only for the first consumer purchaser.

This warranty does not cover cosmetic damage or damage due to acts of God, accident, misuse, abuse, negligence, commercial use or modifications of, or to any part of the product.

This warranty does not cover damage due to improper operation or maintenance (see manual), connection of improper voltage supply, or attempted repair by anyone other than a facility authorized by us to service the product. This warranty does not cover irregular pixel performance on the screen, and damages result due to delivery or improper shipping. This warranty does not cover product sold AS IS or WITH ALL FAULTS, and failure to follow instructions supplied with the product.

This warranty is invalid if the factory-applied serial number has been altered or removed for the product and broken security seal.

The customer must have model number, serial number, and original proof of purchase in the form of a bill of sales or receipt invoice, which is evidence that the unit is within the warranty period, must be presented to obtain warranty service. Our helpful technical support and customer service staff will attempt to correct any minor issues that might be causing the product failure. If the technical service or customer representative is unable to fix the issue by phone, a return material authorization (RMA) number will be issued. Along with the proof of purchase and the RMA number, the customer can ship the defective unit back to us. Once the defective unit is received, and tested, we will ship a replacement unit back to customer. It is the responsibility of the customer to properly package the monitor with plugs, power supply, etc.

We shall not be liable for the loss of the use of the product, inconvenience, loss or any other damages, direct or consequential, arising out of the use of, inability to use, or any claim against the customer by any other party. Some regions do not allow exclusion of incidental or consequential damages, so the above limitations and exclusions may not apply to you.
